

RUNKLE CONSULTING, INC.

2023 in the Rear View Mirror

To close out 2023, we took a few minutes to review **all of the great work our clients have cooperated with us on**. During 2023, we:

- Helped our clients make **102** different dreams become reality
- Spent a lot of the time on the road, making an average of 2 trips per month out of state to see our client's efforts in person
- Continued to provide on-demand support for construction efforts generated by projects we completed in 2022
- Added additional licenses, and are now licensed in 22 states

We also spent 2023 **making friends to give our clients the best possible results** at the most economical price:

- Entered into a relationship with Guardian Structural Technologies in Cleveland, Ohio thanks to our on-going relationship with Three Squared, Inc.
- Formed relationships with a number of firms that offer services for essential disciplines in engineering that are outside our scope of expertise such as Hunter Design Associates and A3 Engineering for MEP work, Rich & Associates for parking deck design and Giffel-Webster for civil and landscape work
- Identified potential companies that do our work, but are licensed in California and Alaska, two states we do not currently plan to become licensed in

In 2023, our YouTube page ([Runkle Consulting - YouTube](#)) continued to grow in popularity! We had over 10,000 views last year, and added over 200 subscribers!

If you get this newsletter, but haven't subscribed to [Runkle Consulting - YouTube](#), please do so as we will be adding new content more often in 2024.

2023 was also a year of growth as we added two regular employees, Charles Holt, and GW Runkle IV. Charles holds a mathematics degree from Georgia State

University and is pursuing a path to become an Engineer in Training. GW is handling our non-engineering tasks to help action feedback we've received and support our continued growth.

What is important to us during 2024?

As we begin our 24th year of operation, there are areas we plan to focus on. Some of these include:

- In person visits to our major clients' home offices
- Refilming our YouTube videos to improve sound quality
- Formalizing newsletter publication to the 15th of the month to help our clients stay in touch and share us with potential clients
- More frequent YouTube and Blog posts
- Continue to appear as the guest in podcasts concerning our industry
- More formalized methods of job tracking through task orders and service contracts

To do all of this and more, we'd like to hear from your firm! Click here if you'd like to provide feedback on what we can do better to support your firm in 2024!

We brought all of Runkle Consulting's regular employees up to Cleveland to meet the GST team and work together in-person on a variety of projects.

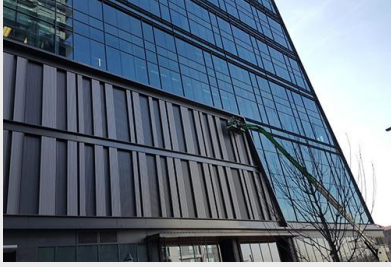

Structural Engineers

Runkle Consulting was founded in 2000 by George W. Runkle III, PE, SE. We provide structural design for structures fabricated from shipping containers, the structural design for building cladding, and forensic engineering services.

[Contact Us](#)

What We Do

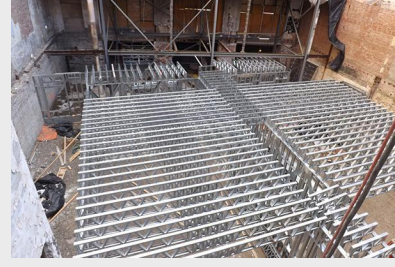

Building Cladding

We have 15 years of experience in the structural engineering of exterior building panels, store fronts, and curtain walls for commercial and government buildings.

Shipping Container Buildings

We provide design services for the design of buildings fabricated from repurposed shipping containers. Our services include the complete design package, architectural, structural, and MEP. Depending on the area, we may be able to help you find a fabricator to provide the containers.

Cold Formed Steel Design

We have extensive experience in cold formed steel design. We can provide structural design services and shop drawings for your project.
